## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Juneau et al. (US Patent 6,254,526) in view of Kobayashi (US Patent 4,385,977) Steinemann (US Patent 4,945,342) and Tyers et al. (US Patent 4,144,889).

Claims 1-36 are rejected for the reasons presented in the Non-Final Office Action filed 14 November 2006. Therefore, Juneau in view of Kobayashi in view of Steinemann and further in view of Tyers makes obvious all limitations of the claim.

### ***Response to Amendment***

The declaration under 37 CFR 1.132 filed 14 March 2007 is insufficient to overcome the rejection of claims 1-36 based upon 35 USC 103(a) as set forth in the last Office action.

As a secondary consideration of non-obviousness, the applicant asserts that their experience and efforts exerted in inventing the claimed hearing aid using stainless steel wire evidences the extreme difficulty of the invention and, ergo, non-obviousness. In other words, because the applicants are of, at least, ordinary skill in the art and they personally felt like their efforts required skill beyond the norm, their traversal of the gap

Art Unit: 2615

between the prior art Juneau reference and the claimed invention was non-obvious.

This allegation could be argued on objective grounds of the level of one of ordinary skill in the art; however, this is unnecessary.

Specifically, the allegation fails to properly consider the explicit suggestion made by Kobayashi to use stainless steel wire in place of copper wire. While the applicants searched for a solution to their wire breakage issues, the prior art had already presented a solution. In one sense, the applicants' traversal on the grounds that their invention presented them with great difficulty evidences the expenditure of skill, perhaps in excess of that possessed by one of ordinary skill in the art; however, the prior art presented an alternative and more obvious course to the same end. Lacking any reason why the middle ground presented in the prior art should be excluded from consideration in rendering the claimed invention, the question of the level of difficulty is moot since a clear link exists between the prior art teachings.

### ***Response to Arguments***

Applicant's arguments filed 14 March 2007 have been fully considered but they are not persuasive. As stated above, applicants' alternative explanation of how they reduced the claimed invention does not refute the clearly taught manner in which one of ordinary skill in the art could have invented, as set forth in the Non-Final Rejection filed 14 November 2006. Therefore, the rejections are maintained.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
